

Science

Year 1-Plants

Prior Learning

There are many differences between plants e.g. not all plants have flowers, and there are different shaped leaves

Plants require regular watering to keep them healthy

Key Vocabulary

plant - a large group of living things that use sunlight to make their own food

leaves - collect energy from the sun and turn this into food for the plant

stem - supports the plant above the ground. It also helps to carry water and

roots - roots absorb water and minerals from the ground. They also help the plant

flower - flowers attract insects to help the plant to reproduce (to make more plants).

petal - part of the flower that is brightly coloured.

bulb/seed - plants grow from seeds and bulbs.

Key Knowledge

Plants are living things.

Plants get their energy from the sun.

Plants need water, sun and air to stay alive.

They grow better if they have nutrient rich soil and warmth.

Wild plant seed grows where it falls. It doesn't need to be planted or cared for as it grows.

Garden plants are plants that people choose to grow in their gardens.

A deciduous tree loses its leaves each year.

An evergreen tree keeps its green leaves all year round, even in the winter.

Plants have a life cycle.

Key Concepts

Generate ideas -

I can ask questions.

I can observe and explore.
